

## Supported Spectrophotometers

pressSIGN directly supports all of the following spectrophotometers;

- Barbieri SpectroLFP S3 and qb
- Barbieri SpectroPad S2
- Barbieri SpectroSwing S2
- Color Sentinel CS-110
- Konica Minolta FD-7 and MYIRO-1
- Techkon SpectroDens and NG (scanning requires Premium)
- Techkon SpectroDrive and NG (Pro only)
- Techkon SpectroJet and 2
- X-Rite 530
- X-Rite EasyTrax (Pro only)
- X-Rite eXact and 2
- X-Rite eXact AutoScan (Pro only)
- X-Rite Eye-One Pro, i1 Pro 2, i1 Pro 3 and Plus
- X-Rite i1iO Table
- X-Rite IntelliTrax and 2 (Pro only)
- X-Rite iSis
- X-Rite SpectroEye

Want to send ink key corrections into the press console? pressSIGN-Pro integrates with many third party closed loop systems including, but not limited to, Digital Information's InkZone Loop, PrintFlow's DIPS Online, Rutherford's AutoPilot and many web based press systems.

Already have a closed loop system on your press? No problem, pressSIGN-Pro will accept data from a variety of different press consoles like Heidelberg's Image Control, Axis Control, Inpress Control, Komori's PDC-S, PDC-SII and PDC-SX, Roland's ColorPilot, KBA's DensiTronic, ColorTronic, EgoTronic and QualiTronic, Ryobi PDS-E and many more press manufacturer's closed loop systems. In nearly all of the above cases pressSIGN works in AutoMode and creates the job without any operator intervention.

See how pressSIGN-Pro can help you and your company improve print quality, meet clients expectations and lower costs. Download a demo of the latest version of the software today.

### Closed Loop Integration

Already have a closed loop system on your press? No problem, pressSIGN-Pro will accept data from a variety of different press consoles;

- AVT / GMi Clarios

- Heidelberg AxisControl, EasyControl, ImageControl and InpressControl
- KBA DensiTronic, ColorTronic, EgoTronic and QualiTronic
- Komori PDC-S, PDC-SII, PDC-SX and Inline PDC-SX
- Roland ColorPilot – Offline, Online and Inline
- Ryobi PDS-E
- Plus many more

In nearly all of the cases above, pressSIGN works in AutoMode creating and scoring the job in seconds without any operator intervention, leaving the printer to focus on the press.

### **3rd Party Press Connectivity**

Want to send ink key corrections into the press console? pressSIGN-Pro integrates with the following 3rd party closed loop systems;

- Digital Information InkZone Loop
- PrintFlow DIPS Online
- Rutherford's AutoPilot and IntelliLoop
- Others that support SVF

Scan the sheet in pressSIGN-Pro and the colour corrections will be automatically transferred to one of the systems above which converts them into ink key movements and communicates with the press console.
